cost-of-living clause in the contract and a demand of the union that a committee of teachers plan the curriculum and make recommendations to the board.

In other developments late last week, teacher strikes began in Waukegan and Benton, and a settlement was reached at Woodstock as well as at LaSalle-Park.

#### Alton Area Starting Pay

The Alton school board Thursday night boosted teacher pay 13½ to a \$755 starting figure, adding that it compared with \$755 at Roxana, Bethalto and East Alton elementary schools and \$744 at Wood River high school.

The Belleville grade school board has filed a petition for an injunction in anticipation of union teachers failing to appear to conduct opening classes, and a hearing is to be held Thursday.

Belleville high school teachers will vote at 8 p.m. today on a proposed new working agreement.

to have a voice in the recommendation of policy on course content and instructional methods and then would translate their proposals into policy recommendations to the superintendent.

"So far, the board has insisted on a three-year contract, has refused to provide the articles on summer school and curriculum and has made no major attempt to come to terms with what the union believes to be a reasonable and productive program.

"This attitude has shut down the schools of Granite City and deprived thousands of students of their education and hundreds of teachers of their livelihood."

"The board of education proposed a meeting last night at 8:30 p.m., having stated to the news media that they had some proposals which they believed would bring about a settlement of the contract.

"Local 743 agreed to meet with the board in the hope that a settlement could indeed be reached, but after two hours of discussion, the board announced for the record that they had no official proposal to make.

"They stated they would meet again at 7:30 p.m. tonight, but the union did not agree to meet."

"In light of the many months of limited progress in reaching an agreement, and in view of

the many offers by the board to meet without having any proposals of substance to present, Local 743 must decline to meet with the board team tonight."

"As a result of the circumstances described above, Local 743 has established the following guidelines for future negotiations if a settlement is to be reached:

"1. Proposal by the board must be firm, official offers and they must be presented to the union 24 hours in advance of a scheduled meeting.

"2. All discussion must take place in the meeting 'on the record'; that is, with the tape recording running, and official minutes must be presented at the following meeting.

"3. No attorneys shall be admitted to the conference room during discussion.

"4. Meetings must take place in a location other than the board office which shall be mutually agreed upon in advance of our next meeting.

"5. Any contractual settlement must include, in addition to one-year salary schedule, the summer school program as outlined by the union, as well as a curriculum program which would allow the teachers to voice the views of the instructional staff.

"This information will be fed into a joint teacher-administration committee for yearly policy recommendation to the superintendent."

"6. All other provisions previously agreed upon by the board and the union.

"When the board has an official written proposal to make, which conforms to the above guidelines, they should contact the Granite City Federation of Teachers Local 743."

"Until such time as a working agreement is fully concluded between the board of education and Local 743, the schools in this district will remain closed."

Jon Mallen, Salary and Policy Committee Chairman, Local 743

The board's reply Friday:

"Your letter of Aug. 28, 1969, makes suggestions which cannot have no other than to make future negotiations more difficult."

"Any problems that have arisen can hardly be blamed on our mutually agreed upon procedures."

"More appropriately, negotiation problems are a result of your failure to negotiate in good faith."

"This impasse is, we hope, in the last inning and this is, therefore, not the time to change the

rules. The board rejects the suggestions in your letter of Aug. 28."

"We stand ready to resume GOOD FAITH negotiations, and we are confident that the mutually agreed upon in February 1969 and followed since that time."

"Please advise us at your earliest convenience when you are willing to do the same."

Donald W. Stucke, Secretary, Board of Education

Local 743 President Johnson said in a statement Friday night that the school board had "rejected by letter in its entirety the union's suggested guidelines for future negotiations."

"The suggested guidelines were brought about when the board failed to make a proposal to the union at last Wednesday night's meeting."

"B. J. Davis had announced publicly last Tuesday," Johnson said, "that the board had a proposal to make at the Wednesday meeting which in all likelihood would send the teachers back to the schools."

"The union, in its response to the board's letter, reaffirms its guidelines, which call for a firm, written proposal in advance of future negotiations."

"The union stands ready to resume negotiations immediately upon receipt of a good faith proposal."

On Saturday, Local 743 said that its "current contract proposal would not require an increase in local taxes for the 1969-70 school year."

"The educational tax portion of the school tax rate, from which teachers' salaries are paid, will remain the same for 1969-70 as it was during the past year."

"The Federation wishes to make the public aware of the fact that any increase in school taxes for the coming year would be the result of the forthcoming building expansion program which was proposed by the Granite City Board of Education and approved by the taxpayers."

"Federation President Johnson stated that the Federation approved wholeheartedly the new building program, but wanted the public to realize that any increase in local taxes would be the result of this program and not a result of the contract being negotiated by the teachers."

"Mr. Johnson said that total costs, including salary increases proposed by the Union, would amount to the same portion of educational funds as has been paid to Granite City teachers in the past."

### 3 Bills Dealing With Crime Are Signed Into Law

Anti-crime laws signed by Governor Richard B. Ogilvie last week will permit evading dropping at the request of a state attorney one party to a conversation as consented and extend criminal code standards of proof and introduction of evidence to proceedings against alleged juvenile delinquents.

Other specifics that persons planning to use insanity or a drugged condition as a defense must submit to examination by a court-appointed expert if the state requests it. It provides that should a defendant refuse such examination, his own experts will not be able to testify on his condition.

A series of bills altering the teacher retirement system was approved by the governor. Included in the changes is an increase in the maximum monthly retirement allowance.

Other Illinois legislation signed last week:

Broadens school board authority, enabling them to set up child care and training centers, with the Illinois Public Aid Department paying day care costs for children of welfare recipients; priority is to be given to children of working mothers.

Increases state support of local adult education programs for younger high school dropouts.

Streamlines Tax Censuses

Permits state prisoners to be furnished to various state departments to participate in research projects (with the prisoner's consent and the governor's written approval).

Extends workmen's compensation laws to Illinois National Guard members on active duty.

Allows marriage for girls under 16 if pregnant.

Authorizes municipalities to allow police and firemen to live outside corporate boundaries.

Tightens regulations on school board elections and school budget methods.

### Village

the village of Chouteau 19 months ago.

Two of the principal witnesses at the hearing on the new referendum proposal—Robert Douglas, operator of the Canal Motel, and James Greer of the G & G Lumber Co.—were among leaders of the Chouteau village incorporation move in early 1968.

1.9 Miles in Earlier Plan

In the Chouteau village election, an area of 1.9 square miles covering 1140 acres, with an estimated population of 2500 persons, was involved. The GMAO railroad tracks formed a part of the eastern boundary.

As in the present election, fears of annexation constituted a major issue. But at that time they were expressed by proponents of the referendum. They cited the Granite City school district's acquisition of a 65-acre site at Maryville road and Route 290, saying the city of Granite City might annex the new school campus.

Generally, Granite City annexed the Grigsby junior high school campus at Pontoon and Carroll roads in a move largely opposed by local residents.

Generally, the area involved in the Sept. 9 referendum includes Sunny Dell Acres and Rae Gene Acres subdivisions on either side of West Chain of Rocks road and extends from Old Alton road on the east to a line near the Chain of Rocks canal bridge on the west.

It does not include the Cedar Park and Hills Terrace subdivisions, nor an area of 200 West Chain of Rocks road south of the highway near Illinois Route Three.

Include Plant Sites

Adjacent to the new territory are areas to boundaries of the newly proposed village content that annexation of additional territory by the new village, if it is established, is almost a certainty since a village as small as that proposed would have difficulty in operating with a limited tax base.

Proponents say that industrial sites are being included, potentially diversified property tax base.

Some observers say that annexation of contiguous territory by the proposed village, no matter how small it was at the beginning, eventually could enable it to take in all or most of the Mitchell area.

Mitchell, which is unincorporated, has been a center of rapid growth and development in recent years.

The only two agencies in Illinois with official status are the volunteer fire district, which is a taxing unit, and the Mitchell public water district, which is not.

They conceivably could be absorbed as municipal facilities by an expanding village with sufficiently strong political leadership.

Annexation Issue

The issue of annexation, either as a threat of taxation or an opportunity for improved living conditions, has played a major part in nearly every election involving municipal organization or operation in the area north and east of Granite City.

A cry for home rule and fear of encroachment by Granite City was effectively used in the campaign that led to incorporation of Pontoon Beach as a village in 1962.

In contrast, the prospect of better living conditions by being part of a bigger city able to provide sewers, fire and police protection and a variety of other services led residents of the old village of Nameoki to merge with Granite City in 1950 after several decades of existence.

and cost of living. For the majority of teachers, this would mean a gross salary increase of at least \$100 in the second year.

"Many charges and allegations have been made concerning the stand your Board of Education has taken. Among such charges is that of 'holding back' or 'hiding' funds which could be used for additional teacher salaries."

"Let's set the record straight: I, yes, your school district did have a bank balance in its Educational Fund from which teachers are paid on June 30, 1969—\$325,101.06. On this same date, however, our district had current liabilities of \$312,526.99."

"Of such total, \$692,797.00 represents salaries due and payable to those teachers who were paid for their own convenience, elected to have their pay for services rendered through May 29, 1969, paid to them on a 12 month basis. Does such bank balance then represent funds available for salary increases in the following year. Obviously not."

"Your school district plans to have a bank balance in its Educational Fund on June 30, 1970. If we do not have a balance then borrowing becomes the only available means of paying the district's then current obligations when due."

"School collections are normally insufficient to pay obligations in the early part of the year. Your Board of Education must not only be concerned about this particular year but also future years."

"2. Your Board of Education is proud of Your School System—it is a good school system. We are particularly proud of the manner in which it has been operated for a considerable period of time. You, as taxpayers, have given excellent backing and financial support to your school system."

"We, your Board of Education, have, in return, tried to see that your school system operated in a businesslike and efficient manner. Many, perhaps even most, school districts in the state have found it necessary to borrow funds from local banks against the following year's anticipated tax collections in order to pay their then current obligations. Your district has borrowed not one cent in such manner since 1963."

"Any funds which were in temporary excess of immediate needs have been invested in order to earn additional funds for use in the operation of your schools. Such practice has, effect, lessened your tax burden."

"In brief summary—Your school district is presently operating in the black. Your Board of Education believes that you want it to remain so."

"The Board of Education has sincerely attempted to represent you in the taxpayer, to be fair to our employees, and to

### Pontoon Village Curfew Adopted

Pontoon Beach village trustees passed the community's first curfew ordinance Thursday evening, requiring youths 18 and under to be off the streets by 10 p.m. Those who violate the curfew will be turned over to juvenile authorities, Pontoon Mayor Thomas Stakoff said.

Young people attending a school or other organized activity which concludes at 10 p.m. will be permitted sufficient time to return home. The curfew hour remains the same on weekdays and weekends.

Village officials learned that maintenance and repair work on village roads began last week. Completion of the project is expected within the next two weeks.

# Columnist John Allen, Historian, Dies at 81

John W. Allen, 81, historian and folklorist of southern Illinois, died at 9 a.m. Friday morning at the Veterans Administration Hospital in Marion. Many of his "It Happened in Southern Illinois" columns appeared in the Press-Record in past years.

He had entered the hospital July 29, following a heart attack sustained on his return from a summer trip to Europe.

Author of two books on the legends and historical lore of the southern third of the state, he packed a multitude of experiences into his long life. Born in a Hamilton county log cabin near Broughton, he attended and later taught at Hardscrabble rural school. He attended SIU at various times from 1908 to 1922.

With the outbreak of world war I, he enlisted in the Marines and saw action in France, remaining as a member of the occupation forces. He stayed in Europe long enough to visit Paris extensively and obtain an assignment to attend London University for a semester, during which time he attended Lady Astor's reception for royalty and American soldiers, listened to Rudyard Kipling read poetry, and heard Prime Minister Lloyd George speak in the House of Commons.

Later, he toured England, tramped around Ireland—where he kissed the Blarney Stone—and walked across Scotland. In basic training, he had been a friend of a fellow Marine, one-time heavyweight champion Gene Tunney. Allen was later to become an amateur boxer and boxing trainer himself.

Years before world wars found him as superintendent of schools at Eldorado, construction superintendent for an Eldorado contractor, and acting director of the natural history museum at SIU. He first joined the university faculty in 1942 as

curator of a museum of handicrafts and pioneer implements. He retired in 1956, with the title "emeritus."

# Guest Takes Overdose

A patron, 23, at the Imperial 400 motel, from Brattleboro, Vt., took an overdose of pills in his room and was taken by ambulance to St. Elizabeth Hospital while in an incoherent condition. It was reported by a roommate at 3:25 a.m. Saturday.

A native of Kampsville, Ill., Mr. Fleming had resided in Granite City for the past 35 years.

An employee of the railroad for 38 years, he retired six months ago. Mr. Fleming was a member of Sacred Heart Catholic Church and held membership in the Brotherhood of Locomotive Firemen and Engineers.

He is survived by his wife, Mrs. Gertrude E. Naumann Fleming; one son, John Fleming of St. Louis; a daughter, Mrs. Lawrence (Virginia) Unfried of Granite City; and seven grandchildren and four great-grandchildren.

"I bought my insurance from a 'captive' agent rather than an 'independent' local agent. When I had a loss I realized that it was "me against the company" — no independent agent to represent me in getting a fair settlement of my claim.

## TROJAN'S OPPONENTS ARE DUMMIES

At least during pre-season drills. While most other teams have held at least a half-dozen intra-squad scrimmages, Coach Al Vander Haar is pitting the Madison varsity against stuffed and weighted dummies until he is certain the offense knows the plays. Below, quarterback Austin Lewis improves his agility and ankle strength in a drill utilizing old auto tires; in the background is a tire device that provides simulated practice in plowing past enemy defensive players.

## Offense Receiving the Initial Emphasis in Trojan Grid Drills

For Madison high school's head football coach, Al Vander Haar, the strategy is offense first.

"We haven't scrimmaged yet. Mainly we're conditioning and dialing with the offense. The offense must know the plays before scrimmaging will be of real value," he told the Press-Record.

"We won't have the depth we had last year. It will be a small squad. There are 15 or 16 experienced players; others are developing slowly, but are coming along."

"If there are any injuries, someone must step in, so no training for just one position."

"I want as few players as possible to go both ways, playing offense and defense. But that will depend on how fast others develop. It looks like we may have six or even eight going both ways."

"Austin Lewis is making a first-year varsity quarterback but is making good progress. Since we're still running dummy plays, it's hard to say what will happen to him and others under game-type pressure."

"He's big, and he's been working and running this summer and has dropped some weight. We're still looking for someone to be a back-up quarterback."

"George Tyus, in shifting from halfback to split end, is coming on strongly. So are Ed Chandler and Willie Ackers."

The varsity line coach, Charles Stepien, briefly appraised the candidates for up-front positions. Among his comments were:

"I expect a lot from Bob Scott and John Ervin. They've always been good. With Harold Campbell, I look for still further improvement."

"Tony Young, Wayne Shaw, George Tyus and Dennis Smith all look good. Ed Chandler is a promising sophomore."

Hutchings' service station won the Labor Day slow-pitch softball invitational meet by defeating six straight opponents. It took the title Monday at Wilson Park by defeating Rozycki 7-4.

In the final, Rozycki led in hits 12-11 but made five critical errors to give Hutchings the decision. Leading Hutchings at the plate were Gary Simpson with a homer and Bob Lewey and Jerry Wallace who batted 5-for-3.

Other Monday results were: Vikings over Falstaff 13-6; Rozycki over Hardfacing 20-7; Rozycki over Vikings 1-0 and Rozycki over Zips 13-2.

Sunday results were: Abel's over Tom's 5-0; Rozycki over Bethel 20-1; Vikings over Mandan 11-7; Keith's over Ogres 7-1; Hutchings over Falstaff 7-3; Zips over Clark's 9-5; Vikings over Keith's 4-3; Rozycki over Abel's 7-5 and Hutchings over Zips 7-4.

On Saturday, it was Rozycki over Holiday 26-5, Abel's over Midtown 18-9, Hutchings over Tom's Shell 3-2 in the 13th inning, Falstaff over Bethel 12-2, Zips over Vikings 6-4 and Clark's over Keith's 15-6.

### Peaches Easy for Home Canning

Pump peaches are versatile fellows. They always taste good fresh. And canned, they're still flavorful, nutritious and a colorful addition to cereals, salads or desserts.

Peaches are one of the easiest and best fruits to can. For a fine-quality product, select firm-ripe peaches that are uniform in quality. They should have a creamy background color; green shows that the fruit is not ripe.

Half a bushel, or 34 pounds, of fresh peaches will make about 10 or 11 quarts of canned fruit.

Although either a hot or cold pack is satisfactory for canning, the hot pack will give a more solid pack because the fruit shrinks in the first heating.

For the hot pack, simmer peaches 3 to 5 minutes in a 20 or 30 percent sirup (one-half or one-third cup sugar to one cup water). But don't cook until soft.

Pack into containers, placing cut side down and overlapping the layers for uniform appearance. Fill containers with boiling sirup. Process in a boiling water bath for 20 minutes.

For the cold pack, place peach halves pit side down in jars, making a firm, uniform pack. Cover with boiling 20 or 30 percent sirup. Process in boiling water bath for 30 minutes or in pressure cooker at 5 pounds for 15 minutes.

**Keeping Cut Flowers Fresh.** Cut flowers from the garden—that's a pleasure you like to prolong. You might like to follow these suggestions for getting the longest life from cut flowers.

Pick flowers either in the early morning or late in the evening when the stems are full of water. Cut them with a sharp knife—not with scissors or shears. Take a container of water with you to the garden and put the stems in it immediately. Cutting the stem at an angle may aid in water uptake.

Indoors, fill a deep container with lukewarm to warm water, about 85 to 100 degrees F. Then plunge the flowers into the water. Place the container in a cool spot overnight or for a few hours to allow the flowers to "harden off," or take up all the water they can.

## Pronounced Dead Here

A Hunter Packing Co. employee at National City, he leaves his wife, three brothers and three sisters. His remains were taken to a Collinsville funeral home.

## Wollet, License Lost

Loss of a billfold in Granite City was reported at 4 p.m. Saturday by Michael Johnson, 3601 Lincoln avenue. It contained his driving license.

The trio was picked up on Interstate 244 in a 1961 auto bearing license plates later were found to have been stolen from the auto of a Madison man Saturday.

Madison authorities said they received an inquiry from Missouri state police at Kirkwood at 4:30 p.m. concerning details of a break-in at the Victory tavern, 1729 Edwardsville road. Madison police at that time had no such burglary report.

Police learned from Joe Sobolewski, proprietor, who went to the tavern to investigate, that it had been entered. Sobolewski had closed the tavern at 11:30 p.m. Sunday and the place was not open yesterday.

The burglars, who piled a screen off a kitchen window to gain entry, took about 20 cartons of cigarettes, one case of liquor, an undetermined amount of silver and four sides of ribs from the refrigerator.

Missouri troopers informed Madison police they found a quantity of cigarettes and liquor in the car after they had stopped the three men, and that upon questioning the men admitted breaking into the tavern.

The three suspects were held in jail at Clayton today. No charges had yet been filed this morning.

Madison officers said license plates on the car in which the men were riding were stolen Saturday from the car of Kenneth Frizzell, 1635 Second street, Madison.

## \$15,000 Loss by Fire in Madison; Arson is Blamed

Fire which Madison authorities said was the work of an arsonist destroyed a house and two garages and extensively damaged three other homes in the 1600 block of Third street late Thursday afternoon.

Madison Fire Chief Edward J. Miller estimated the overall damage at \$15,000.

The blaze originated in the garage at the rear of a two-story frame home occupied by Edward Moad at 1612 Third street, firemen reported, and quickly spread to three adjoining houses and a neighboring garage.

Miller said a delayed alarm was received on the fire. The fire first was sighted by a city hall employee, who was standing in front of the police station. He notified Miller in the compressor's office.

Fire equipment was leaving the station as the first alarm was received by police.

**Other Homes Damaged**  
The blaze gutted the Moad residence and damaged the houses at 1608 Third street, occupied by Mrs. Mary E. Moad, 1610 Third street, occupied by Lyman L. Rogers, and 1614 Third street, occupied by Joseph Sharp.

The second garage destroyed was at the rear of 1610 Third street, adjoining the Moad property.

Quick spread of the fire was attributed by Miller to the explosion of a gas meter located in the garage on the Moad property near the point where the fire apparently originated.

feeding a jet of escaping gas into the flames.

Chief Miller said he has "no doubts" that the fire was the work of an arsonist and follows a pattern of several other fires in the same neighborhood within the past few months.

A pumper from the Venice fire department arrived on the scene to aid Madison firemen a few minutes after the alarm was sounded.

**Houses Close Together**  
All of the houses were located only a few feet apart, enabling the blaze to leap from one structure to another in a short period of time.

Immediately after firemen arrived on the scene, a brief gust of wind whipped the blaze around the whole row of houses, the chief said.

While fighting the blaze, Miller reported, firemen were approached by a man who informed them there was a six-pound keg of gunpowder in the basement of the house at 1614 Third street. Firemen knocked out a basement window and the man reached in and pulled out the keg.

Miller said firemen did not learn the identity of the man, who said he used the powder to load shells.

Firemen were at the scene about four hours. The fire was brought under control and the threat to other houses eliminated at about 6 p.m. The first alarm was received at 3:55 p.m.

**Madison-Namecki Crash**  
Autos driven by Stephen P. Cuppett, 120 Central lane, and Peter Skundrich, 1617 Elizabeth street, Madison, collided at 11:10 p.m. Thursday at Madison avenue and Namecki road.

**FIRE FANNED BY WIND** and an exploding gas meter swept through a row of four homes in the 1600 block of Third street, Madison, Thursday afternoon, leaving this view of charred rubble in the rear of the houses. Two garages also were destroyed. Officials attribute the fire to an arsonist.

## Panels to Interview Candidates Wednesday

Candidates for the Illinois constitutional convention delegates will be interviewed at a conference at SIU-SW Wednesday at 7:30 p.m.

The candidates will meet earlier in the Loveloy Lounge and then go to three locations to be interviewed by panels from their districts. The panels will include university professors and representatives of organized labor, Chambers of Commerce, the League of Women Voters and news media.

Members of the clergy will serve as moderators.

Students on the hospitality committee at SIU-SW will assist anyone not familiar with the location of rooms.

The local, on 53rd, district session is set for the Loveloy Auditorium; the 52nd district, Peck Classroom Building Room 2405; and the 54th district in Peck Room 3303.

There will be no registration fee, and all interested citizens are being urged to attend.

**Tax Levy Due for City Council Action—Again**

Further consideration of the city's 1969-70 tax levy is expected to top the agenda of the Granite City council tonight for the third consecutive week.

Adoption of the tax levy, calling for tax income of \$3,309,720, was blocked in last week's meeting on a deferral motion by Alderman R. E. Robertson, who asked for a report on the city's anticipated revenue from sources other than property taxes.

The city tax levy must be adopted and filed with County Clerk Eulalia Hotz by Sept. 9 to qualify the city for extension of taxes to be collected next year.

Council members during the past two weeks have voted down four proposed tax rate increases that would have raised the city's rate by a total of 23 cents. Finance officials estimate the city's income during the current 1969-70 year will be more than a half-million dollars short of budgeted expenditures.

Well acquainted with the United Fund campaign and the individual workings of each division and section, Milonski has been a member of the UF board since 1964. He served as secretary of the board and for two years was on the Admissions and Distributions Committee.

**Former General Chairman**

## Fall Camporee, United Fund Topics of Board

A meeting of the Cahokia Mound Council, Boy Scouts of America, executive board, was conducted at a restaurant in Highland Thursday evening to review fall plans, with President G. Rollin Ilen presiding. Twenty members and a guest, David Norton, executive director of the United Fund, attended.

Reports were given by David Parrish and George Peo, leaders, who attended the seventh national jamboree in July, held at Farragut State Park, Farragut, Id.

The board gave full support to scout participation in the United Fun Fair Sept. 27-28 at Wilson Park. The scouts are to have a refreshment stand and informational booth and will have members of troops distributing free gifts and literature.

Robert Franz, council camping chairman, announced that the council's fall camporee is scheduled for Oct. 3, 4 and 5 at Cahokia Mound State Park for Boy Scout troops and Explorer posts.

Named to attend a Tri-Cities United Fund coffee hour meeting on Sept. 15 were Henn, Melvin Gillie, G. H. Sternberg, Howard Kaseberg, Henry D. Karandjoff and Glenn Thornburg.

## To Decide Whether to Act Against Supt. Page

A spokesman for the Cook county state's attorney says a decision will be made this week on whether to attempt prosecution of State Supt. of Public Instruction Ray Page, who has denied that employees were required to pay salary kickbacks to a "welfare fund."

Mrs. Paula Gilbert, 62, former clerk-typist in his Chicago office, alleges she was fired after balking at continuing to pay 1% of her \$475 monthly salary. She and other employees have declared they received no benefits from the fund.

## Law Requires Special Instruction For State's Handicapped Children

(The City and Illinois Bar Associations)

Among the 7,300,000 public school children returning to Illinois classrooms this August and September are approximately 250,000 children who will be receiving special education services.

The law requires that special education facilities be maintained for handicapped children in each of six different categories as follows:

- (1) Physically handicapped children whose disability (other than a speech defect) makes it "impracticable or impossible for them to benefit from or participate in a normal classroom program."
- (2) Maladjusted children whose social or emotional problems make them "unable to make constructive use of their school experience."
- (3) Retarded children who are educable to the extent that they can be made "economically useful and socially adjusted."
- (4) Retarded children who can be trained in a group setting "designed to further their social adjustment and economic usefulness in their homes or in a sheltered environment."
- (5) Children with defective speech.
- (6) Children with multiple handicaps.

## Retail Trade Trends Analyzed

(Granite City Long-Range Plan)

Between 1954 and 1963, the number of retail trade establishments in Granite City increased substantially below that of most of the surrounding communities and the state.

The decrease was from 400 to 394, or 1.5%, compared to declines of 7.5% (499 to 462) in Alton, 13.4% (417 to 362) in Wood River, 0.3% (226 to 225) in Madison county and 7.0% (39,000 to 36,000) in Illinois. Collinsville had an increase of 3.7% (219 to 227).

From 1958 to 1963, a significant change took place in which Granite City almost recaptured its losses from the previous period. This latter change followed the trend of the surrounding communities and the county.

From 400 retail establishments in Granite City in 1954, the figure dropped to 370 four years later before rising to 394 during the subsequent five years.

The period of 1954-63 has been described as a period of readjustment to changing consumer needs, to changing economic structure and to problems relating to growth and comparative shopping.

Next: Selective services and wholesale trade.

## Scholarship Grant Tax Exempt

(Internal Revenue Service)

Q. Is a graduate school fellowship service tax exempt? A. Income from a fellowship is usually tax exempt. If you are a candidate for a degree, there is no limit on the amount of tax-free income you may receive from a fellowship or scholarship grant.

However, if you teach or perform other services in connection with the award, that part of the award that represents payment for these services is fully taxable. This rule does not apply if all candidates for the degree, whether they have a fellowship or not, are also required to perform these services.

For additional information, send a postcard to your District IRS Director for a free copy of Publication 507, "Tax Information On Scholarships and Fellowships."

Q. What are the benefits listed over 65 get when they sell their homes? A. All or part profit from such sales may be tax-free under certain conditions are met.

For example, the taxpayer must be 65 or older on the date of the sale and have owned and used the home as his principal residence for at least five of the preceding eight years.

For more details on this provision of the law and to learn more about the tax benefits for those 65 or over, send a postcard to your district office and

## Boat Owners in 'Operation Clean Lake' Sunday

"Operation Clean Lake," a cleanup of the shores and islands of the Mississippi River from Alton upstream more than 20 miles, will take place from 1 to 7 p.m. Sunday, Sept. 14. Originally scheduled for July 13, the program had to be postponed because of high water on the Mississippi River.

The activity, expected to involve hundreds of boats, is being coordinated by Pride, Inc., an organization concerned with beautification of Alton Lake and nearby communities.

The general chairman, Herbert R. Hellrung, president of Hellrung Construction Co., Alton, says, "We have involved the members of the St. Louis Power Squadron, the Plaza Council of Boy Scouts, Alton Mountebank club, Meramec Canoe club, owners of the five dozen harbors on Alton Lake, and many of the private boats berthed at the harbors."

Purpose of the activity is twofold: "To actually clean up the debris left by boat owners and others, and to increase public awareness of the need to keep trash in the boat."

## Collection Boxes

Owners of boats not moored in Alton Lake harbors are to pick up large collection boxes at the Clifton Terrace Marina, four miles north of Alton on Meadams Memorial Highway.

Boats based on Alton Lake may obtain materials from their harbor masters.

The U. S. Coast Guard, Coast Guard Auxiliary and U. S. Army Corps of Engineers St. Louis District are cooperating in the venture.

Owners of safe, high-speed runabouts have been asked to volunteer their craft to transport groups of scouts to designated scout cleanup areas.

Alton Lake ranks sixth nationally on the list of inland water recreation areas. "Pride is more concerned with educating boat owners on proper methods of trash disposal than the actual cleanup of the islands at this time," Hellrung adds. "One good flood leaves everything absolutely free of logs, beer cans, paper and other debris. The problem that we don't have enough high water, and so the areas get very messy by midsummer."

Sept. 14 has been set as an alternate date if there is rain Sept. 7.

# Electric Heat. It's one of the oldest ideas under the sun.

## Also one of the newest.

For a method of heating, it's hard to match the sun. But radiant electric heat comes close.

It provides a unique kind of warmth that surrounds you with comfort. Just as the sun does on a pleasant day.

Ask your neighbors who live in electrically heated homes and apartments: they'll tell you electric heat is a new experience in comfort.

And they'll probably mention the pleasure of individual thermostats controlling the temperature in each room.

We'll be glad to give you the whole story about the newest idea in heating under the sun.

## County Studies Use Of Computer System

Use of a computerized criminal data storage bank by the Madison county sheriff's office is being considered by the full committee of the county board of supervisors.

Termed Law Enforcement Agencies Data System, it now is used in all 50 states with the central bank located in Washington, D.C.

The sheriff's office formerly used a teletype system until rental more than doubled, jumping from \$110 to \$240 per month, and has been using the state police connection with the computer system.

But the state police district office at Maryville is discontinuing the service for the sheriff's office. The county connection would cost \$243 per month, with a \$155 installation charge.

The high speed system stores information on persons and stolen items which is made available to police authorities within minutes and can be tapped by any connected police agency in the U.S.

## Deadline to Meet Clean Air Goals Advanced 2 Years

A two-year speed-up in enforcing final goals of air quality standards for sulfur dioxide and particulate pollutants was enacted by the Illinois State Air Pollution Control board Thursday, apparently on the basis of testimony submitted at Quad-City area hearings in early August.

During its regular monthly meeting in Springfield, the board adopted a 1972 deadline on achievement of new clean air standards for the Illinois section of the federal St. Louis air quality control region.

Originally, the board had proposed a 1974 deadline, with partial goals to be reached by a 1972 interim date.

C. W. Klassen, technical secretary of the state air board, said the two-year advance in the new clean air goals was decided upon because of testimony by the public and representatives of air pollution control agencies demanding the achievement of clean air in the shortest possible time.

A long list of witnesses testified at a public hearing held Aug. 12 at Southern Illinois University Western campus.

At least a dozen representatives of citizen clean-air groups complained of long delay in enforcement of clean air standards. Officials of Missouri and St. Louis air pollution control agencies particularly attacked the 1974 deadline as too far distant and urged the Illinois board to advance it.

The new standards will be forwarded by the Illinois board to the U.S. Department of Health, Education and Welfare, which must approve them before they become effective. Standards for the Missouri side of the air quality region have been adopted; those also must be approved by HEW.

## Antidiseestablishmentarianism Topic of SIU-SW Speaker

Causes of recent campus unrest and the student view of the "establishment" were explored by George R. Mace, associate professor of government, in a commencement address at Southern Illinois University's southwestern campus Friday night.

Mace told more than 500 graduates that the so-called "new left" and protest groups "have as much difficulty explaining to one another the real meaning of

the term 'establishment' as they have to the older generation."

Because these students cannot define the term, Mace commented, neither can they develop a systematic program which might provide for the changes they seek or make clear to the university what they want done.

"An attack upon the establishment is like swinging away in a room full of marshmallows because of its nobleness. On the other hand, the university is

concrete, visible, reachable and vulnerable," Mace said.

**Generals and Capt. Kangaroo**

He pointed out that many professors were attacking U. S. policy in Vietnam and social injustices "when many of today's young demonstrators were still watching Captain Kangaroo. He added that if structures in our social system are corrupt, then the university is the least corrupt.

Mace's solution for campus

unrest and the incorporation of more contemporary ideas at the college level included fostering of innovation, spontaneity and creativity. "The university is based upon the suasion of the force of reason or it is not a university," he said.

Mace said that in order to make higher education more relevant, the university must work itself into a position where it can become independent of the establishment, while continuing to be supported by it.

## Salvation Army Aiding Victims Of Hurricane

More than 1550 Salvation Army workers, active in the Hurricane smelter area, have been serving the needs of 40,000 Mississippi flood victims, reports SA Major Leslie Hall, divisional commander for Jackson, Miss.

Efforts of the workers are being supported by Salvation Army units across the country which are collecting and sending clothing, bedding and blankets to the disaster-struck coastal areas.

A total of 350 accredited vehicles are working over a 70-mile Mississippi Gulf Coast region, in which 40 Salvation Army centers, equipped with water purifiers, are on duty serving food.

To meet the urgent need for water, the Salvation Army in Florida is shipping orange juice in large quantities as a water substitute. The SA personnel are working in the open as there is no shelter available. Major Hill reported last week.

He noted that authorities are permitting Salvation Army vehicles free access to the disaster areas and that food and clothing depots are functioning in Gulfport, Boloxi, Long Beach, Bay St. Louis, Hattiesburg, Pascagoula and Pass Christian.

Seventy-two families in New Orleans were moved by Salvation Army Men's Social Service Center trucks and the Army is assisting with emergency housing in Mobile, Ala.

### Fund Request

The Salvation Army official said there is an urgent need for funds to underwrite the service being rendered. In addition, there is a need for canned meats and canned food of all descriptions.

Food may be air shipped to: Salvation Army Major Leslie Hall, 365 Buchanan street, Hattiesburg, Miss. 39401.

Salvation Army 3901 Brigadier John W. Pate, divisional commander for Missouri and southern Illinois, requests that any monetary contributions from this area be channeled through the Midland Divisional Headquarters Office, 2827 Clark avenue, St. Louis, Mo., 63103, marked specifically for "Hurricane Disaster."

Gifts of clothing and bedding, if urgently needed, can be taken to the Granite City Salvation Army Office, 1239 Nineteenth street, or placed in the Salvation Army boxes at 19th street and Grand avenue and the Namekiki Village shopping center. Capt. Harold Thomas, local SA commander said.

Donations of all types for the disaster area should be marked "Hurricane Disaster" for purpose, he added. Quad-City residents with gifts may call 451-7957.

Other bulletins from southern Salvation Army leaders note that cantenates and officers were airlifted to Gulfport with supplies from Dossins Air Force Base. Disaster units from Texas, Georgia, Florida, Alabama, Louisiana and Mississippi are on duty, coordinated from Jackson, Miss.

## Schools Using Channel 9 to Include 3 in GC

Twenty-nine new schools in Missouri and Illinois will begin utilization of in-school programming from Ketc, Channel 9, when daytime telecasting is resumed on Sept. 15, according to Basil G. Murray, director of school services for the non-commercial TV station.

Webster Parkview elementary schools will be among the new schools taking part in the educational television series during the 1969-70 school year, joining pupils who attend Marshall school, where an ETV pilot program was conducted last year for 140 intermediate (4th to 6th grades) students.

Participation in the educational television program by GC schools will be limited to 150 pupils at any given attendance center, with staggered participation within a building to afford students of various ages an opportunity to utilize the TV learning medium.

The ETV program for local schools was approved by the Granite City board of education following evaluation of the experimental program at Marshall school by Owen E.

## Grapes, Crochet Items Rate High At DuQuoin Fair

A bunch of Concord grapes grown in a back yard in Granite City won a third place ribbon at the DuQuoin state fair, which ended on Labor Day.

Glenn Lilly, 2149 Robert avenue, earned the ribbon for his blue grapes exhibit. It was the first time the local man has displayed a product of his garden in a competition, although he has grown grapes in the yard of his home for the past 25 years.

Grape growers from many sections of Illinois competed in this year's DuQuoin state fair, including a produce division, with their entries on display throughout the main exhibition hall.

In addition to the third place ribbon, the Lilly family collected four other ribbons for exhibits.

Mrs. Lilly, a well-known local seamstress, won a second place award for a crocheted vanity set. Her mother, Mrs. Berline Lamont, earned two firsts and one third-place ribbon.

Mrs. Lamont, who also entered the DuQuoin Fair for the first year, won blue ribbons for a three-piece infant sweater set and a single infant sweater and a white ribbon for a luncheon cloth, including napkins and place mats. All the winning entries were in crocheting.

Mrs. Lilly noted that her mother owns a collection of 36 ribbons for exhibits entered in previous years at the New Missouri State Fair.

Last summer, the local couple's daughter, Rachel, 16, captured a first-place trophy in the DuQuoin fair's photography division with a portrait of her dog, a part boxer and German shepherd.

## Federal Disaster Grant Approved On July Rains

President Richard M. Nixon on Saturday declared Illinois a major disaster area due to damage from heavy rains and flooding in southern and western parts of the state beginning June 29 and continuing in July.

He made an initial allocation of \$500,000 in federal funds to assist in the repair or replacement of public property. The action followed a request by Gov. Richard B. Ogilvie.

Illinois also was allocated \$500,000 in a disaster declaration by President Nixon June 6 for damage resulting from spring floods. It was included in a \$20 million Operation Flood prevention program covering 25 states.

Madison was among the 26 Illinois counties declared a major disaster area by Gov. Ogilvie July 1 following an inspection tour by a state committee. Applications for federal money were filed through the Illinois state civil defense headquarters, with the East Side Levee and Sanitary District seeking \$2,750,000, Granite City \$372,000, Nameoki township \$100,230 and Madison \$202,500.

In other actions Saturday, President Nixon set aside an additional \$1 million for Ohio health and sanitation measures and repair or replacement of public property damaged or destroyed by floods and tornadoes in early July (Ohio has now been allocated \$2 million) and provided \$200,000 in declaring Vermont a major disaster area from severe weather and floods that began July 29.

The Illinois Ohio and Vermont fund distributions during the weekend were authorized under the Federal Disaster Act. They will be administered by the Office of Emergency Preparedness.
